INFORMED CONSENT FOR PEDIATRIC DENTAL TREATMENT

Delaying treatment may allow dental disease to progress to an emergency situation, including, but not limited to: abscess formation, infection, pain, fever and risk to the developing permanent teeth, or contribute to a long-term dental problem.

The most common complications associated with pediatric dental treatment include nausea, trauma to soft tissue, prolonged numbness and bruising following the administration of local anesthesia. Less common complications include, but are not limited to: infection, swelling, prolonged bleeding, vomiting, allergic reaction, nerve injuries, further degeneration of restored teeth, fracture or teeth during extractions (requiring surgical treatment), brain damage and even loss of bodily function or life.

The above information is accurate and complete to the best of my knowledge. I will not hold my dentist or staff responsible for any errors due to omissions that I may have made in the completion of this form. It is ultimately my responsibility to inform the office of any changes in my medical history, personal information and insurance information. The parent or Guardian who accompanies the child is responsible for payment at time of service. We reserve the right to charge for any appointments that are cancelled or broken without 24 hours advanced notice.

Our office is HIPPA Compliant and is committed to meeting or exceeding the standards of infection control mandated by OSHA, the CDC and the ADA. I have received a copy of this office's Notice of Privacy Practices.
